FEATURED PARTNER

SUPREMIS Sp. z o.o.

Ayala is now fully paperless in warehousing and its process is digitized with Produmex Scan

In 1990, AYALA started a new factory with highly qualified professionals using state-of-the-art equipment and began the production of manually crafted hair salon furniture. Today, after nearly 30 years, you can find their products in hair salons worldwide. AYALA furniture is manufactured manually under the best carpentry practices and using cutting-edge, advanced machinery and technologies which support human work.

Customer Challenges

- Improve the flow of goods in warehouse processes such as receipt of goods at the warehouse, goods releases, inventory, and systematizing work by making barcode labels.
- Goods were received manually by warehouse workers.
- Administration department manually entered data transferred from the warehouse.

Solution

- Introduction terminals guide manual workers (not vice versa), where manual input is as limited as possible.
- Terminals with improved user experience providing all instructions for workers.
- All material and operations times on operations are done almost automatically just by clicking the ok/not button. Nothing else is required to be reported in the system.

Results

- Faster execution of orders allowed them to increase the number of goods sold to our customers. This results in more significant revenues to their budget.
- Systematization of work translates into the efficiency of their employees and less stress due to the lack of clutter in the warehouse.
- More accurate verification of stock levels.

"THE SAP BUSINESS ONE SYSTEM STANDARD DOES NOT OFFER SOFTWARE FOR WAREHOUSE COLLECTORS. THE ENTIRE PROGRAM IS AN ADDED VALUE IN WAREHOUSE PROCESSES. THE EASE OF USE IS GREATER THAN THAT OF OTHER PRODUCTS."

Leszek Sierpiński / COO
