## INDUSTRY

Adhesive technology and advanced materials

## EMPLOYEES

30

## BOYUM SOLUTIONS

B1 Usability Package

## FEATURED PARTNER

Silver Touch Technologies UK Limited

The Tecman Group is a UK-based organisation focused on innovative product design, advanced material technology, and high-volume manufacturing. Established for over 25 years, Tecman industrial adhesive tape solutions are deployed throughout manufacturing industries, from automotive and wind power to electronics and healthcare. They are advocates for the responsible use of plastic materials and where possible aim to reduce environmental impact by using biodegradable or bio-sourced materials.

## Customer Challenges

- All processes were manual and there was no solution available for automation or data validation, which frequently led to input errors and subsequent rework.
- Customer Service, Operations, and Stock Control were affected. There were too many verifications reliant on user memory.

## Solution

- B1 Usability Package enables Tecman to be self-sufficient in customizing SAP Business One to their needs and adding data validation procedures to multiple screens, ensuring that information is always correct and reducing input errors.

## Results

- Universal functions, validations, and item placement tools.
- Tecman's staff do not have to spend time investigating and fixing errors as validations prevent them from happening, and Tecman's IT team can save money that would otherwise have to be spent with programmers if they were not self-sufficient for creating their own low-code customizations and validations.

*"B1 USABILITY PACKAGE GIVES US MORE CONTROL OVER OUR OWN PROCESSES. AFTER ALL, WE AS USERS KNOW BEST WHAT WE NEED BOTH IN TERMS OF WHAT CHECKS ARE REQUIRED AND WHEN THEY SHOULD BE TRIGGERED"*

Shan Wilkinson / Finance Director
