## Granotec obtained **the automation and optimization in its processes** with B1UP and B1P&D

Granotec, a leading company in the delivery of nutritional and biotechnological solutions, created in Chile in 1981, works hard on quality, research and development of formulations, with a focus on innovation and adding value to the Food Processing Industry in Chile and America. The company offers high-value formulations that optimize processes, yields, times, manufacturing costs, and standardize quality.

### Challenges

- Too many manual tasks. Need for automated solutions.
- Delay in response times to customers and internally in the operating circuits.

### Solution

- Efficiency in response times by users who use SAP.
- Improvement of circuits and they were replanned according to the solutions provided by Boyum.

### Results

- It was possible to improve the image of the company as a solution to its customers.
- They resolved internal challenges, provided a simpler solution and complied with good business practices.
- All the areas benefited, since they are all connected with the sales and operational part.

*"NATIVE SAP DOES NOT MEET ALL THE REQUIREMENTS OF AN ERP. BOYUM COMES TO MEET THE NEED THAT COMPANIES HAVE IN HAVING A TOOL THAT ALLOWS THEM TO MOLD THEIR INTERNAL CIRCUITS TO THEIR NEEDS."*

Francisco Cosentino , Granotec Argentina SA
