BOYUM SOLUTIONS

Beas Manufacturing

FEATURED PARTNER

ERT Intégration

R-MECA Group was created in Toulouse in 2005. Historically a workshop of MAN Diesel & Turbo and specialized in the machining of diesel injection components for engines for marine applications and power stations, R-MECA Rectification offers rare and numerous know-how in very high precision machining. The company masters complete processes for the production of complex parts in small and medium recurring series for all sectors of activity.

Customer Challenges

- Information system was aging, and it was difficult to evolve it and adapt it to the new requirements requested by their customers.
- Working with their information system was often tedious and required several re-entries.
- Production and Quality departments were affected.

Solution

- Ability to see in pre-sales the power of the solution.
- Ability to put all the information they had to manage in a single tool.
- SAP Business One and Beas Manufacturing allowed them to manage all of their production data.

Results

- Better definition of their processes and more precise monitoring of their cost prices.
- Improvement in the management of their stocks.
- Control of production declarations and their production costs.

"MANAGING ALL THE INFORMATION IN ONE SOLUTION ALLOWS OUR COMPANY TO HAVE RELIABLE DATA AND MAKE THE RIGHT MANAGEMENT DECISIONS."
