FEATURED PARTNER

Ascarii Limited

Metrasens Ltd was founded in 2005 and is based in the United Kingdom. The company develops and manufactures ferromagnetic detection and full-body scanning systems and installs medical devices that improve hospital safety. Their innovative products are designed to address deficiencies in conventional screening methods. Metrasens has grown rapidly to become a dynamic international business with a Technology Center and manufacturing facility in the UK, a North American sales and customer service hub in Chicago, and a global network of distributors.

Customer Challenges

- Slow processes/flow, inconsistency of data, additional steps, and paperwork in the processes.
- Limited productivity, logistics operations, and visibility of data on the production shop floor.
- Long time spent waiting for paperwork to be completed before goods could be shipped out the door.
- Increased time to receive production orders in SAP.

Solution

- Speed from demo to launch on the shopfloor.
- Minimal setup and customization requirements.
- All the Boyum tools deploy quickly, and easily and integrate effortlessly into the business environment.
- Initial deployment has been very quick, with further rollouts of features as time goes on.
- Emailing documents.

Results

- Real-time data from shopfloor captured gives fast process flow.
- Minimal paperwork and accurate data.
- Products are built, packed, and shipped out much quicker and more efficiently than before.

"GREAT INTUITIVE ADD-ONS TO SAP, BRINGING THE NEEDED FUNCTIONALITY ON TOP OF THE BASE LEVEL SAP FUNCTIONALITY."

David Barnes / IT Systems Manager
