J&D Wilkie gained management control and reduced paper usage with B1 Usability Package & B1 Print & Delivery

For more than a century, J&D Wilkie Ltd has always been committed to the expansion of industrial textiles-related businesses, constantly trying to develop new materials to solve application-oriented problems faced by various industries, and has now become a global leader in industrial materials and textiles. Wilkie has a Scottish factory, a Jiaxing factory in China, and branches in the United States, Japan, and India. The annual output value of the group is approximately 60 million pounds.

Challenges

- Sending invoices and statements by paper.
- Lack of automation.
- Finance department was impacted.

Solution

- Automate credit control.
- Gaining functionality with Boyum features.
- Enabling electronic documents.

Results

- Improved controls.
- Reduced paper usage.
- Increased ability to respond to customers on a customized basis.

"We have used B1UP and B1P+D to enable the sending of electronic documents, added functionality into production ordering and the associated processes to improve the native UI and improve controls."

Roger McGill / Chief Financial Officer
